

METHOD OF MANAGEMENT AND CONTROL OF VOICE CALLS AND
GATEWAY FOR SAME

5

ABSTRACT OF THE DISCLOSURE

10 A method of management and control of voice calls
and a gateway for the same designed to maintain a real-
time characteristic of speech and a constant quality of
speech comprising a first step of discriminating whether
or not an input packet is a voice call packet, a second
15 step of deciding, when discriminating that the packet is
a voice call packet, whether or not the voice call packet
can be carried over the transmission path based on both
an available band provided in the transmission path and a
required band for the voice call packet, and a third step
20 of transferring the voice call packet only when it is
decided that it can be carried.
